

The Stegosaurus River Water Rights Agreement 1645

The purpose of this agreement is to fairly appropriate water rights along the Stegosaurus River. Littlefoot has access to 500 acre-ft of water, if river flows are above 100 cfs. If flows fall below that amount, Littlefoot must reduce water use to 350 acre-ft to ensure adequate water volumes are available for Petrie's farm. Petrie requires a minimum of 150 acre-ft to produce enough vegetation to feed the valley.
